(54) Title: A LABEL LAMINATE AND A METHOD FOR MANUFACTURING A LABEL LAMINATE

(57) Abstract: The present invention relates to a label laminate and a method for manufacturing a label laminate. The laminate comprises a first label material layer (A) and a second label material (B). The method comprises: forming a pattern in which adhesive areas (1) and non-adhesive areas (2) alternate on the face side of the first label material layer (A) and on the face side of the second label material layer (B); aligning the adhesive areas (1) on the first label material layer (A) with the non-adhesive areas (2) on the second label material layer (B) and aligning the non-adhesive areas (2) on the first label material layer (A) with the adhesive areas (1) on the second label material layer (B); attaching the face sides of two label material layers (A, B) to each other. The adhesive areas are formed by a screening method. The non-adhesive areas have a surface energy, which is at least 25 dynes.
